* The estimates of the population of England and Wales up to the year 1910 have been made by means of the rates of increase in the various intercensal periods as shown by the several enumerations; those for 1911-14 are based upon the returns of births, deaths, and migration; while the estimates for 1915 and 1916 are mainly based upon the results obtained under the National Registration Act, 1915, and those for 1917-20 upon natural increase and migration, with any necessary adjustments for the armed forces. The figures for males included in the estimates for 1915-18 relate to civilians only; those for 1919 and 1920 include the armed forces at home. The results of the Census of 1921 have been taken into account in framing the estimates for 1920 and 1922, and the enumerated population in 1921 has been adopted as the estimate for the middle of that year. In calculating rates for leap years for England

estimated to the middle of each of the Years 1874-1923, exclusive of portions of the Armed Forces and Merchant Service Abroad.

TABLE E.—Population, Births, Deaths, Infant Mortality, Natural Increase, 1923.—
Counties, County Boroughs, Municipal Boroughs and Urban Districts,
Rural Districts.

NOTE.—The estimates of population shown in the following table have been based primarily on the 1921 Census returns (See Section "Population" in Text). In the case of districts marked with an *, changes in boundaries have occurred during the year, and the populations have been adjusted in order to make them comparable with the records of births and deaths. Particulars of the changes of boundary will be found in Table AA, Part II. The births and deaths exclude stillbirths. Deaths are transferred to the area of residence of the deceased person; births occurring away from home have been transferred to the area of residence of the parents. Deaths of non-civilians have been excluded throughout this table, the districts in which this exclusion appreciably affects the rates being referred to in footnotes.

* Population adjusted to allow for changes in boundary during the year.

† Death-rates based upon estimated civilian populations as follows:—North Riding—Administrative County, 312,900; Municipal Boroughs and Urban Districts, 177,248.

‡ From later information it appears that this estimate of population should be increased to 15,600, the crude birth, death and natural increase rates being accordingly 19·6, 11·2 and 8·4 per 1,000 population respectively.

* Prior to 1st January, 1908, no statutory returns were available with regard to the passenger movement between the United Kingdom and the Continent of Europe, and the returns furnished voluntarily were to some extent incomplete, and were not prepared on an absolutely uniform system. Hence the figures given above for the years 1904 to 1907 cannot be regarded as a complete statement of the passenger movement between the United Kingdom and other countries in those years. † Balance inward. ‡ Balance outward.

§ The figures for the last nine months of 1923 are exclusive of passengers who departed from, or arrived at, ports in the Irish Free State.
